

Project: **Ugur Ihtiyar - Project Studio**

View: **Top View - walls  
"folded out"**

Scale:  **$1/8" = 1'$**

Suggested Auralex Products:

One (1) Project 2 Roominator Kit

Kit Includes:

(8) LENRD Bass Traps

(24) 2'x2'x2" Studiofoam Wedges

Mounting Adhesive

-One Pair ProMAX Portable Treatment System

Two (2) Stands and Panels Included

*ISO Series*

MoPAD Monitor Isolators

SubDude Isolation Riser

MudGuard Vocal Isolator

GRAMMA Isolation Risers

Notes:

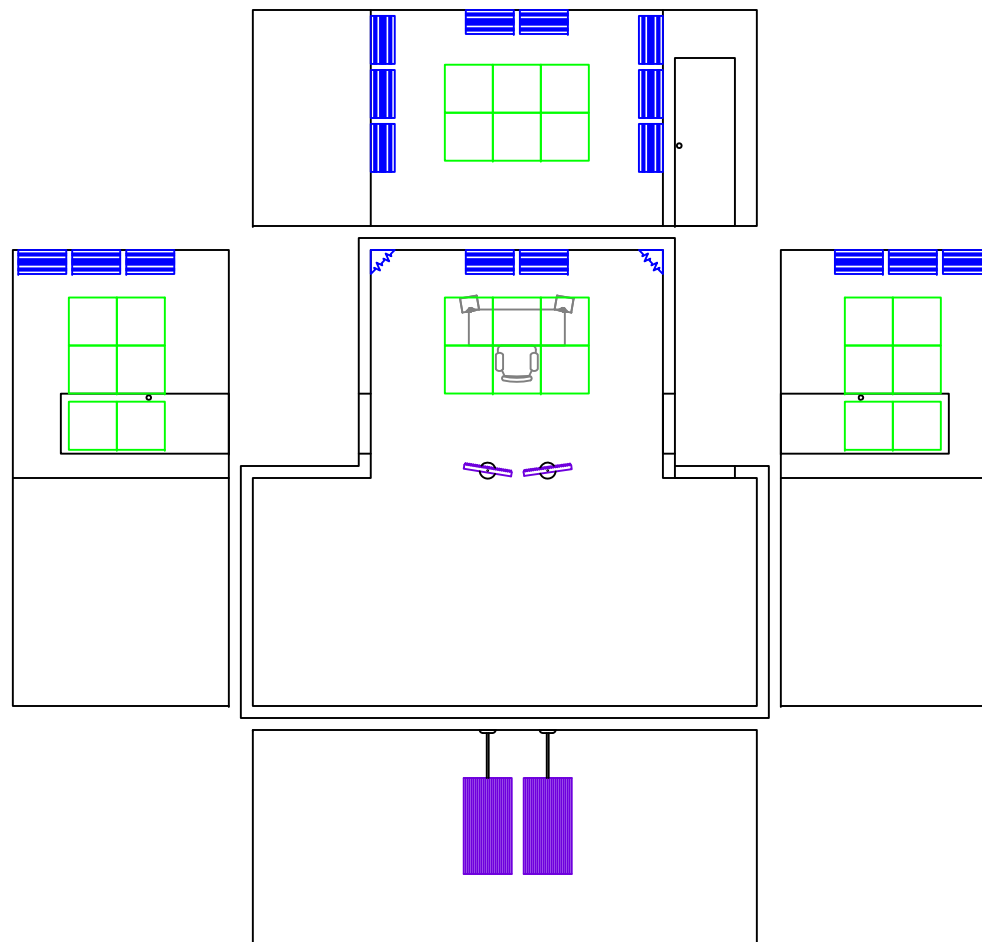

1. Space the Studiofoam Wedges evenly over the walls and ceiling as shown, and they should help control overall reverberation and "room ring."

2. Place the LENRD Bass Traps in the vertical and horizontal corners, where possible, to help control low frequency build up. Spacing the LENRD's out 3-6" will provide additional absorption with exposed edges.

3. Place the ProMAX Portable Treatment System as shown. The Panels can also be adjusted to fit the needs of the room.

4. In the event of HVAC, Lighting Fixtures, etc. that will hinder product placement, adjust panel orientation to fit or carefully cut the Studiofoam with an electric carving knife.

The treatment shown to the right can help to improve the sound quality inside the room. For additional tips on sound isolation, visit [www.acoustics101.com](http://www.acoustics101.com).
